SQL Injection Incident Report

Meridian Retail Group - shop.meridianretail.com

Source log file: ../logs/01_sql_injection_meridian_retail.log

Report generated: 2026-08-22 10:54:24

Generated by: Log Analysis Toolkit

CRITICAL: 1 auth bypass event(s), 6 account takeover(s), ~64,307,891 bytes exfiltrated

Executive Summary

Log lines analyzed	2,500
Suspicious SQLi requests	986
Blind extraction probes	840
Distinct attacker IPs (SQLi)	3
Authentication bypass events	1
Customer accounts taken over	6
Data exfiltrated via hijacked session	~64,307,891 bytes
WAF blocked requests	2

Top Source IPs Sending SQLi Payloads

Source IP	Requests
91.132.45.201	840
185.220.102.8	80
185.220.101.47	66

Requests by attacker IP

UNION-Based Data Dump Targets

Tables enumerated and dumped via UNION SELECT:

Table
admin_sessions
employee_payroll_view
gift_cards

Table
saved_payment_methods
users

Blind Boolean-Based Extraction (High-Volume Probing)

A second actor used near-identical, incrementally-varying requests to extract data one character at a time via ASCII/SUBSTRING comparisons. This volume of repetitive similar requests from one IP is a hallmark of blind SQL injection.

Source IP	Blind probe requests
91.132.45.201	840

Authentication Bypass

Auth bypass from 185.220.101.47, session=sess_9f2c1a

Post-Bypass Admin Actions and Exfiltration

IP	Path	Bytes
185.220.101.52	/admin/export_customers?format=csv	4812004

Credential Stuffing: Compromised Customer Accounts

6 customer accounts were successfully taken over using credentials obtained from the earlier data dump, then used to place fraudulent orders.

Compromised account (email)
diana.akinyi887@outlook.com
simon.maina220@yahoo.com
ibrahim.odhiambo511@proton.me
robert.mohamed207@yahoo.com

Compromised account (email)
ann.wanjiru556@gmail.com
brian.wafula56@proton.me

Automated Scanner Noise

80 requests were also observed from a generic automated vulnerability scanner probing many product IDs with basic SQLi payloads.

WAF Blocked Destructive Attempts
